### The Rise of a New IT Operations Support Model

By 2015, DevOps will evolve from a niche strategy employed by large cloud providers into a mainstream strategy employed by 20% of Global 2000 organizations.

### Why DevOps will not emerge:

- Cultural changes are the hardest to implement, and DevOps requires a significant rethinking of IT operations conventional wisdom.
- There is a large body of work with respect to ITIL and other best practices frameworks that is already accepted within the industry.
- ▶ Open source (OSS) management tools, which are more aligned with this approach, have not seen significant enterprise market share traction.

### Why DevOps will emerge:

- ► DevOps is not usually driven from the top down and, thus, may be more easily accepted by IT operations teams.
- ▶ITIL and other best practices frameworks are acknowledged to have not delivered on their goals. enabling IT organizations to look for new models.
- ▶ The growing interest in tools such as Chef, Puppet, etc., will help stimulate demand for OSS-based management Gartner

# 什么是DevOps?

- 来自实践中的经验,为了解决实践者的问题
- 不是方法论,不是产品/工具,不是标准,不是 职位
- 完全基于社区技术分享而推送
- 没有核心组织,全面开放

### Configuration as Code 基础架构即代码

让运维团队将运维服务转换为运维能力提供给开发团队,让开发团队像引用代码一样引用运维能力。运维团队通过对环境代码的改善将运维所关注的稳定性,性能,安全性等要求作为约束传导给开发团队,开发团队利用这种能力将业务价值更快的交付给用户,最终实现研发和运维的整体敏捷。

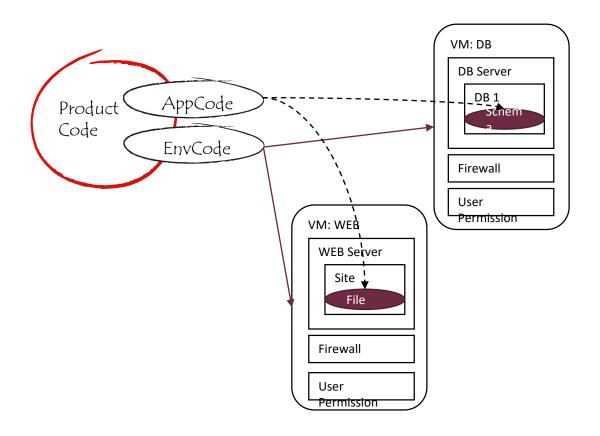

### Configuration As Code 工具链支持

# Configuration As Code

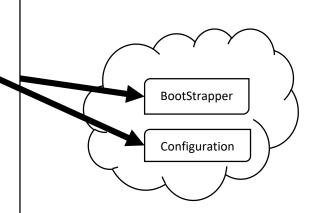

### 实现:Powershell DSC + Azure

```
configuration AzureVM
 Import-DscResource - Module xAzure
   # Create the Azure VM
    xAzureService TestService
                 = "Present"
      Ensure
                 = "Dev-Svc01"
      Name
   # Create the Azure VM
    xAzureVM TestVM
                 = "Present"
      Ensure
      Name
                 = "DEV-VM01"
   CLIENT
```

```
configuration AppDeploy
